# TEC COURSE SYLLABUS

## ***ILLINOIS VALLEY COMMUNITY COLLEGE***

### Course Syllabus

**Division:** Career and Technical Programs  
**Course:** GNT (General Technology) 1210 -  
Taste of Engineering Careers (TEC)

Date: March 5, 2010  
Semester Hours: 2  
Lecture hours per week: 2  
Labs hours per week: 2  
Seminar hours per week: 0  
Other hours: 0  
Prerequisite:  
Semester Offered: Spring / Fall  
Instructor(s): Perez, Gibson, Schwingle, Bias

#### **I. CATALOG DESCRIPTION**

The 2 hour Taste of Engineering Class ( TEC ) utilizes a design project from Purdue University to teach basic technology skills while focusing on a single project from start to finish. In the TEC class students will design and build a guitar.

#### **II. EXPECTED LEARNING OUTCOMES AND RELATED COMPETENCIES:**

Upon completion of the course, the student will be able to:

##### 1. Analyze the relationship between Music and Physics

Competency 1.1 Calculate frequency and wave length.

Competency 1.2 Given a change in wave length, predict changes in tone.

Competency 1.3 Define resonance.

##### 2. Correctly wire and setup guitar electronics

Competency 2.1 Given a wiring schematic, correctly wire a pickup coil.

Competency 2.2 Install wires and tune a guitar

##### 3. Utilize a CAD tool to design guitar parts.

Competency 3.1 Evaluate current designs.

Competency 3.2 Design parts using CAD.

Competency 3.3 Design parts using 3D CAD.

Competency 3.4 Print out scaled model of parts on 3D printer.  
 Competency 3.5 Perform a compatibility check.

#### 4. Make Neck and Body Blanks.

Competency 4.1 Evaluate tolerance on neck and body blanks.  
 Competency 4.2 Evaluate uniformity on neck and body blanks.  
 Competency 4.3 Make a neck and body to fit design.

#### 5. Use appropriate tools for Material Removal.

Competency 5.1 Safely use the band saw.  
 Competency 5.2 Safely use scrapers and sanders.

#### 6. Assemble a guitar.

Competency 5.1 Glue fretboards to neck.  
 Competency 5.2 Install frets.  
 Competency 5.3 Install wiring harness.

### **III. COURSE CONTENT:**

- 1 How a guitar works - music, physics
- 2 Wiring and setup
- 3 Instrument design, examples of current design
- 4 Instrument design using CAD tools
- 5 Finish CAD work, print subscale parts on 3-D printer and check for compatibility
- 6 Make neck and body blanks, importance of tolerance and uniformity
- 7 Make neck and body blanks, make fretboards
- 8 Make neck and body blanks
- 9 Cut necks and bodies
- 10 Cut necks and bodies
- 11 Sand and finish bodies, glue fretboards to necks
- 12 Sand and finish necks, install frets
- 13 Wiring harnesses
- 14 Final assembly and setup
- 15 Final assembly and setup
- 16 Measuring build variation, jam session :-)

### **IV. INSTRUCTIONAL METHOD:**

Lecture  
 Lab  
 Project based

**V. INSTRUCTIONAL MATERIALS:**

Parts kit  
Lab Manual Perez, Gibson

**V. STUDENT REQUIREMENTS AND METHODS OF EVALUATION:**

Quizzes	10%
Labs	40%
Attendance	10%
Project completion	40%

90 % - 100%	A
80% - 89.99%	B
70% - 79.99%	C
60% - 69.99%	D
0 % - 59.99%	F

**VI. REFERENCES:**

Engineering the Guitar, by Richard Mark French

## NINE-WEEK TEC COURSE PLAN

Each of the nine TEC course sessions meets for 3 1/2 hours.

Each of the sessions includes:

- Lecture(s), exercise(s), and/or demonstration(s) on STEM topics related to guitar construction
- Laboratory work on guitars

Week	Lecture – Exercise - Demonstration	Laboratory Work on Guitars
1	<ul style="list-style-type: none"> <li>• Building a Guitar in CAD and Solid Modeling</li> <li>• The Math and Physics of the Guitar</li> </ul>	<ul style="list-style-type: none"> <li>• Solid Works session in CAD lab</li> <li>• Students receive guitar body and begin hand sanding</li> </ul>
2	<ul style="list-style-type: none"> <li>• Guitar body and neck styles</li> <li>• Importance of uniformity and tolerances</li> </ul>	<ul style="list-style-type: none"> <li>• Student use resources to decide on headstock design</li> <li>• Design their own using CAD</li> </ul>
3	<ul style="list-style-type: none"> <li>• Science and physics behind fret boards</li> </ul>	<ul style="list-style-type: none"> <li>• Sand and finish necks</li> <li>• Glue fret board to neck</li> <li>• Install frets</li> </ul>
4	<ul style="list-style-type: none"> <li>• Guitar electronics: wiring diagrams</li> <li>• Guitar finishes</li> </ul>	<ul style="list-style-type: none"> <li>• Students do setup and wiring</li> <li>• Students complete sanding and finishing</li> </ul>
5	<ul style="list-style-type: none"> <li>• Using Solid Modeling to program tool paths</li> <li>• More on CAD</li> </ul>	<ul style="list-style-type: none"> <li>• Use Solid Works and Mastercam to program CNC machine</li> <li>• Use 3-D printer to subscale parts and check for compatibility</li> </ul>
6	<ul style="list-style-type: none"> <li>• How a guitar works: acoustics</li> </ul>	<ul style="list-style-type: none"> <li>• Finish necks</li> <li>• Cut out head stocks</li> </ul>
7	<ul style="list-style-type: none"> <li>• Assembling a guitar: pickups, strings, tuner, string nut</li> </ul>	<ul style="list-style-type: none"> <li>• Assemble guitars</li> <li>• Check tolerances</li> </ul>
8	<ul style="list-style-type: none"> <li>• Final assembly</li> </ul>	<ul style="list-style-type: none"> <li>• Finish assembly</li> </ul>
9	<ul style="list-style-type: none"> <li>• Measuring build variation</li> <li>• Jam session</li> </ul>	<ul style="list-style-type: none"> <li>• Check tolerances</li> <li>• Tune</li> <li>• Play</li> </ul>

- Additional instruction on guitar construction is integrated into the lab work.
- Information on engineering and engineering technology careers and on programs and courses available at IVCC is integrated into nearly all course sessions.

The work done by the students includes:

- finishing the guitar body, customizing the finish and design on the body,
- cutting and finishing the head, customizing it to their preference,
- assembling and soldering the electronics following a schematic,
- installing the electronics,
- assembling the guitar.

The students utilize a variety of software, equipment and tools:

- AutoCAD,
- Solid Works,
- 3-D Printer,
- multimeter,
- electronic tuner,
- fret press, drill press with a plug cutter,
- band saw,
- circular and belt sanders,
- clamps and pins,
- ices,
- files,
- chisels,
- rasps,
- soldering irons,
- cordless drills,
- cordless screw drivers, and
- a number of hand tools.

## LAB FACILITIES AND EQUIPMENT NEEDED

- Tables for sanding, painting, soldering
- Space to hang guitars while paint dries
- Classroom with computers - Internet, AutoCAD, SolidWorks
- Multimeter
- Electronic tuner
- Fret press
- Sanders,
- band saw,
- clamps,
- pins,
- vices,
- files,
- chisels,
- rasps,
- soldering irons,
- drills,
- screw drivers,
- various hand tools.
- 3-D Printer, optional

## TEC COURSE INFORMATION SHEET

### Taste of Engineering Careers (TEC) Course GNT 1210 – Illinois Valley Community College – 2 sem. hours

The Taste of Engineering Careers Course focuses on engineering technology skills with a single project – designing and building an electric guitar. Each student will design and construct a guitar, which becomes the property of the student upon successful completion of the course.

**Course Credit:** 2 semester hours (IVCC credit hours)

**Course Eligibility:** Open to LaSalle-Peru High School and Area Career Center seniors by application. Juniors may be eligible in special circumstances. Since this course is supported by a National Science Foundation grant and only 10 seats are available, applications will be evaluated on the basis of the goal/objectives of the NSF grant, the quality of responses on the application and the individual's potential for success in a technical/technology-related project.

**Tuition:** Free. IVCC tuition of \$139.50 for 2 credit hours plus a \$5 registration fee and \$100 of the cost of guitar components are supported by a National Science Foundation grant.

**Fee:** \$75 to be paid to IVCC by the student before the first course session. This fee covers the portion of the cost of guitar components not funded through the NSF grant.

**Schedule:** The course will meet on nine Saturdays: October 3 to Dec. 5, 2009 (does not meet Nov. 28) from 8 a.m. to noon in the Agriculture Building on the IVCC East Campus.

#### Course Content:

- How a guitar works : music and physics
- Wiring and setup
- Instrument design, using CAD tools
- Neck and body blanks: Tolerance, uniformity
- Fretboards
- Sanding and finishing
- Wiring harnesses
- Assembly and setup
- Measuring build variation

**Instructors:** Dorene Perez, Program Coordinator of CAD; Jim Gibson, Program Coordinator of Electronics; Tim Bias, Program Coordinator of Manufacturing/Industrial Maintenance

National Science Foundation Grant #0802505

## **Building an Engineering Technology**

### **Workforce:**

## **A Plan for Reaching Young People, Adults and Women**

Illinois Valley Community College

2008 - 2011

### **Goal and Objectives**

The goal of Building An Engineering Technology Workforce is to increase the number of people in the Illinois Valley Community College district who prepare to enter engineering and engineering technology careers. This project targets high school and middle school students and adults (non-traditional students), with specific efforts directed at women. The objectives of project activities are:

- To increase awareness of and interest in engineering and engineering technology careers, with special emphasis on the work of engineering technicians.
- To assist in preparing students to enter engineering and engineering technology programs by integrating science, technology and math into project activities
- To increase enrollment in engineering technology programs at IVCC.

Further information about the grant project is available at [www.ivcc.edu/nsf](http://www.ivcc.edu/nsf) and from the grant project staff:

## SAMPLE CONSENT FORMS

### Parent Permission Letter

**[On IVCC letterhead]**

**[Attach one page summary of grant]**

Dear Parent

We are conducting a study to determine the interest level and effectiveness of activities we are offering as part of a project funded by the National Science Foundation and titled "Building An Engineering Technology Workforce." Your child or ward will be asked to complete surveys indicating what he/she thought of the activity(ies) and of engineering as a career.

There are no risks to your child or ward. Survey responses will be confidential and no one will be able to identify your child or ward when the results are reported. Your child/ward will not be identified individually; no one will know who filled out the survey, and all surveys will be anonymous. Participation is completely voluntary. There is no penalty for not participating in the survey and your child/ward will not be identified whether they participate or not. They have the right to refuse to complete any, all, or part of the survey without identification or penalty.

Results of this anonymous, voluntary survey may be reported to the National Science Foundation and disseminated as part of the project.

If you have any questions about this study, please contact Dorene Perez, Program Coordinator of CAD/CAE at Illinois Valley Community College (815-224-0221). Or, for other questions, contact the Director Institutional Research at IVCC (815-224-0540).

Sincerely

Dorene Perez  
Principal Investigator of NSF Grant  
Program Coordinator of CAD/CAE

-----

I understand the study described above and have been given a copy of the description of the project outlined above. I agree to allow my child/ward to participate with his/her assent when possible.

Results of this anonymous, voluntary survey may be reported to the NSF and disseminated as part of the project.

Please place a check mark in the boxes below for your response to the following statements.

		Strongly agree	Agree	Unsure/ no opinion	Disagree	Strongly disagree
1	I believe engineering is a good career for a woman.					
2	I believe engineering is a good career for a man.					
3.	Women can be as good as men in math and science.					
4.	Engineers often demonstrate creativity.					
5	Engineers need to have good communication skills					
6	Engineers need to work well with people and be good team players.					
7	Engineers must have good math skills					
8	Engineers must have a good background in science.					
9	I believe engineers make meaningful and important contributions to our lives.					
10	I believe engineering is "cool."					
11	Math is fun					
12.	Science is fun.					
13.	I feel confident about my technical skills.					
14.	I have thought about a career as an engineer or engineering technician					

15.	I am planning a career as an engineer or engineering technician.					
16.	A teacher/counselor(s) has suggested I consider a career as an engineer or engineering technician.					
17.	My parent(s) have suggested I consider a career as an engineer or engineering technician.					

18. Are you aware of the difference between the work of engineers and engineering technicians?       Yes       No

19. Are you aware that IVCC offers programs in engineering and industrial engineering technology that transfer to four-year colleges?       Yes       No

20. Are you aware that IVCC offers two-year career degrees in computer-aided engineering and design and in electronics technology that lead to employment?  
 Yes       No

21. Are you       Male       Female

22. Are you       Junior       Senior

Results of this anonymous, voluntary survey may be reported to the NSF and disseminated as part of the project.

Please place a check mark in the boxes below for your response to the following statements.

		Strongly agree	Agree	Not sure- No opinion	Disagree	Strongly disagree
1.	Engineers often demonstrate creativity.					
2.	As a result of this TEC course, I have a better understanding or appreciation of the creativity in engineering.					
3.	Engineers need to work well with people and be good team players.					
4.	As a result of this TEC course, I have a better understanding or appreciation of the teamwork in engineering.					
5.	Engineers must have good math skills					
6.	Math is fun or interesting					
7.	As a result of this TEC course, I have a better understanding or appreciation of practical applications of math.					
8	Engineers must have a good background in science.					
9.	Science is fun or interesting					
10	As a result of this TEC course, I have a better understanding or appreciation of practical applications of science.					
11.	I feel confident about my technical skills.					
12.	This course helped me improve my technical skills.					

13. Match the words with the definitions below:

- \_\_\_\_\_ a. Engineer  
 \_\_\_\_\_ b. Engineering Technician

1. Work is hands-on – emphasis on practical applications. Typically requires a 2-year degree.
2. Designs structures, machines, systems, etc. More theoretical. Typically requires a 4-year degree

14. As a result of this TEC course, I am  
 \_\_\_\_\_ More likely to pursue a career in an engineering or engineering technology field  
 \_\_\_\_\_ Less likely to pursue a career in an engineering or engineering technology field  
 \_\_\_\_\_ No change in my career attitudes and intentions.

15. My current plans are to pursue a career in \_\_\_\_\_

16. As a result of this TEC course, I am  
 \_\_\_\_\_ More likely to attend IVCC  
 \_\_\_\_\_ Less likely to attend IVCC  
 \_\_\_\_\_ No change in my attitude toward IVCC

17. I plan to enroll at \_\_\_\_\_ after high school graduation  
 (name of college or technical school)

18. Are you aware that IVCC offers programs in engineering and industrial engineering technology that transfer to four-year colleges? \_\_\_\_\_ Yes \_\_\_\_\_ No

19. Are you aware that IVCC offers two-year career degrees in computer-aided engineering and design and in electronics technology that lead to employment? \_\_\_\_\_  
 Yes \_\_\_\_\_ No

20. Are you \_\_\_\_\_ Junior \_\_\_\_\_ Senior

**National Science Foundation Project:** Building an Engineering Technology Workforce.  
#0802505

Illinois Valley Community College, Oglesby, IL [www.ivcc.edu/nsf](http://www.ivcc.edu/nsf)

Contact: Dorene Perez, Principal Investigator, 815-224-0221, Email: [dorene\\_perez@ivcc.edu](mailto:dorene_perez@ivcc.edu)

Results of this anonymous, voluntary survey may be reported to the NSF and disseminated as part of the project.

Please place a check mark in the boxes below for your response to the following statements.

		Strongly agree	Agree	Not sure- No opinion	Disagree	Strongly disagree
1.	Engineers often demonstrate creativity.					
2.	As a result of my son/daughter taking the TEC course, I have a better understanding or appreciation of the creativity in engineering.					
3.	Engineers need to work well with people and be good team players.					
4.	As a result of my son/daughter taking the TEC course, I have a better understanding or appreciation of the teamwork in engineering.					
5.	Engineers must have good math skills					
6.	As a result of my son/daughter taking the TEC course, I have a better understanding or appreciation of practical applications of math.					
7.	Engineers must have a good background in science.					
8	As a result of my son/daughter taking the TEC course, I have a better understanding or appreciation of practical applications of science.					
9.	There are good career opportunities available for engineering / engineering technology graduates.					
10	Engineering talent is in short supply in the U.S. today.					

17. Match the words with the definitions below:

\_\_\_\_\_ a. Engineer

\_\_\_\_\_ b. Engineering  
Technician

3. Work is hands-on – emphasis on practical applications. Typically requires a 2-year degree.

4. Designs structures, machines, systems, etc. More theoretical. Typically requires a 4-year degree

18. Since your son/daughter enrolled in the TEC course, have you discussed an engineering career with your daughter(s)?

\_\_\_\_\_ yes                      \_\_\_\_\_ no                      \_\_\_\_\_ not applicable

19. Since your son/daughter enrolled in the TEC course, have you discussed an engineering career with your son(s)?

\_\_\_\_\_ yes                      \_\_\_\_\_ no                      \_\_\_\_\_ not applicable

16. Are you aware that IVCC offers programs in engineering and industrial engineering technology that transfer to four-year colleges?                      \_\_\_\_\_ Yes                      \_\_\_\_\_ No

17. Are you aware that IVCC offers two-year career degrees in computer-aided engineering and design and in electronics technology that lead to employment? \_\_\_\_\_  
Yes                      \_\_\_\_\_ No

18. Are you                      \_\_\_\_\_ Male                      \_\_\_\_\_ Female

19. Your highest education level:

\_\_\_\_\_ did not complete high school

\_\_\_\_\_ high school

\_\_\_\_\_ some college

\_\_\_\_\_ associate degree

\_\_\_\_\_ 4-year college degree

\_\_\_\_\_ advanced degree

## Engineering Career Survey

Please place a check mark in the boxes below for your response to the following statements and add any comments you would like to make.

		Strongly agree	Agree	Unsure/ no opinion	Disagree	Strongly disagree
1	Engineering is a good career for a woman.					
2	Engineering is a good career for a man.					
3	Engineers need to be creative.					
4	Engineers need to have good communication skills					
5	Engineers need to work well with people and be good team players.					
6	Engineers must have good math skills					
7	Engineers must have a good background in science.					
8	Engineering exercises can help students understand math and science concepts.					
9	Engineers make a big contribution to our lives.					
10.	Engineers are "cool."					

11. Are you aware of the difference between the work of engineers and engineering technicians?      \_\_\_\_\_ Yes      \_\_\_\_\_ No

12. Are you aware that IVCC offers transfer programs in engineering and industrial engineering technology? \_\_\_\_\_ Yes \_\_\_\_\_ No

13. Are you aware that IVCC offers two-year career degrees in computer-aided engineering and design and in electronics technology? \_\_\_\_\_ Yes \_\_\_\_\_ No

14. Are you \_\_\_\_\_ Male \_\_\_\_\_ Female

15. Are you \_\_\_\_\_ Counselor \_\_\_\_\_ Faculty \_\_\_\_\_ Administrator \_\_\_\_\_ Other \_\_\_\_\_  
(job title-area)

IF FACULTY, please check your department and respond to the statements below:

16. \_\_\_\_\_ Area Career Center \_\_\_\_\_ Business & Family Consumer Sci.  
 \_\_\_\_\_ Career and Technical Education \_\_\_\_\_ Driver's Ed., Health & Physical Ed.  
 \_\_\_\_\_ English \_\_\_\_\_ Foreign Language, Music & Art  
 \_\_\_\_\_ Math \_\_\_\_\_ Science  
 \_\_\_\_\_ Social Science \_\_\_\_\_ Special Education

17.	My students believe engineers are "cool."	Strongly agree	Agree	Unsure, no opinion	Disagree	Strongly disagree
18.	The approximate percentage of my students interested in becoming engineers is	0%	10%	25%	50%	75% or more

## SAMPLE PUBLICITY RELEASE

NSF Grant Activities  
Fall 2009

Illinois Valley Community College is offering collaborative efforts with area high schools and junior high schools to encourage more young people to consider engineering-related careers.

Current activities, supported by a \$520,000 grant from the National Science Foundation, include:

- A Taste of Engineering Careers (TEC) course for IVCC credit in which high school juniors and seniors experience various engineering fields as they build an electric guitar. Each student will take home the guitar they build. The course is being pioneered with students at LaSalle-Peru High School and the Area Career Center this fall and will expand to other high schools.
- A Tech Club for high school students in which members develop leadership and teamwork skills. Activities include field trips, speakers, hands-on projects and affiliation with the state and national Technology Student Association. A Tech Club was organized at LaSalle-Peru High School last spring and one is being organized at Ottawa High School this fall.
- A camp for middle school girls meeting weekly in Ottawa to engage the young women in hands-on science, technology, engineering and math exercises.

“We want young people to understand the impact engineers have on everything around us and to experience what its really like to be an engineer or engineering technician,” said Dorene Perez, the director of the grant and program coordinator of Computer Aided Engineering and Computer Aided Design at IVCC.

Upcoming events include working with the Girl Scouts on engineering-related badges, an inventor’s camp for students at Shepherd Junior High in Ottawa, an engineering poster contest for junior high and high school students, a tea for promising high school women, and an Edible Car Contest at IVCC.

During the summer, 12 students from Lincoln Junior High School in LaSalle participated in the Challenger Learning Center camp headquartered in Bloomington, Ill.

To reach adults who may be seeking career changes, informational and promotional materials about engineering technology are being developed.

Further information about the grant activities is available from Dorene Perez, program coordinator of computer aided engineering/computer aided design, who heads the grant project as Principal Investigator. Email [dorene\\_perez@ivcc.edu](mailto:dorene_perez@ivcc.edu) or call 815-224-0221.

Other IVCC staff members on the NSF grant team are Jim Gibson, program coordinator of electronics; Sue Caley Opsal, anatomy and physiology instructor; Rose Marie Lynch, communications instructor; Jeanette Maurice, work-based learning coordinator for the Education for Employment Office; Tracy Morris, director of admissions and records; and Francie Skoflanc, program coordinator of graphic arts. Dawn, Wiggins, mathematics instructor, is leading the middle school girls’ camp in Ottawa.

## NSF GRANT PROJECT SUMMARY

### **Building an Engineering Technology Workforce: A Plan for Reaching Young People, Adults and Women**

National Science Foundation Grant # 0802505, \$520,000 for 2008-2011

Illinois Valley Community College, Oglesby, IL 61348

Principal Investigator: Dorene Perez, [dorene\\_perez@ivcc.edu](mailto:dorene_perez@ivcc.edu)  
815-224-0221

Co-Principal Investigators: Jim Gibson, Sue Caley Opsal, Rose Marie Lynch

Senior Personnel: Jeanette Maurice, Francie Skoflanc, Tracy Morris

#### **Grant Project Summary**

“Building an Engineering Technology Workforce: A Plan for Reaching Young People, Adults and Women” is a comprehensive recruiting project designed to increase the number of people who prepare to enter engineering and engineering technology careers in the Illinois Valley Community College district. The objectives of the project are:

- To increase awareness of and interest in engineering and engineering technology careers, with special emphasis on the work of engineering technicians.
- To assist in preparing students to enter engineering programs by integrating science, technology, engineering and math (STEM) into activities.
- To increase enrollment in engineering technology programs at IVCC.

Grant initiatives address the barriers that prevent each of the target groups from selecting engineering careers:

- for young people the major barrier is perceived difficulty;
- for adults the major barrier is lack of awareness of engineering career benefits;
- for women the major barrier is the perception of engineering as not feminine and not relevant to their lives.

Major project activities include:

- (1) Project-based short-term events to interest a broad base of young people,
- (2) Project-based camps for middle school students and young women,
- (3) High school engineering technology clubs,
- (4) A Taste of Engineering Careers (TEC) course, focused on building a guitar, for IVCC credit to high school juniors and seniors.
- (5) A Leadership Team for high school students,

- (6) Exciting special projects for high school students,
- (7) Promotional materials targeting young people, parents, adults, women
- (8) Publicizing successes of participants in area media.

Project activities that target young people are being offered in a sequence to create and build interest in and commitment to careers in engineering technology. The sequence starts with short-term special events offered to a broad base of students at middle schools and high schools. At the middle school level, the next step is to offer inventor's camps. At the high school level, tech clubs are being organized to provide opportunities for hands-on projects. The next step for high school juniors and seniors is a Taste of Engineering Careers course for IVCC credit, and finally, creating a Leadership Team for promising high school students, modeled after the highly successful team at IVCC.
